## Personal Info

Name: Gonçalo Cravo  
Phone: +351915174706  
Email: goncaloscravo@gmail.com  
Born: 30/06/1996  
Address: Vagos, Aveiro  
Driver License: (B)

## Personal Skills

Organization  
Communication  
Teamwork  
Active listening

## Tech Skills

Java	Kafka
Docker	RabbitMQ
Spring Boot	Html
Quarkus	Css
Maven	Javascript
Insomnia	React
Postman	Primavera
Mysql	Phc

## Languages

Portuguese	Native
English	B2

## Hobbies

Tennis	Travelling
Gym	Volleyball
E-sports	

## About me

Junior Backend developer, I'm looking for my first professional opportunity in the backend area. It's been challenging to find an opportunity as a junior backend developer so I have been learning front-end technologies (HTML, CSS, and JavaScript) with the goal of becoming a fullstack developer in the future and open up more opportunities in the job market. Always ready to learn and take on new challenges!

## Experience

**Self-Taught Projects** Oct2023-present

**Accounting** 6months/2022

**Gecave**

Profissional Intership (IEFP)

**Promoter** Jan/2020

**TrueInstinct**

Product apresentation, get people contacts and give samples.

**Volunteer** 2019-2020

**Carlota**

Project associated to education, get financial help for scholarships for children's in Soga island(Guinea Bissau)

**Accounting Assistant** 6Months/2016

**Vagogest**

University Intership (Tech.Course)

## Education

**Udemy** March 2024 - present

React - The Complete Guide 2024 (incl. React Router & Redux)

**Udemy** March 2024

The Complete Javascript Course 2024

**Udemy** Oct 2023

Microservices with Spring Boot and Spring Cloud, Apache Kafka and RabbitMQ

**Mindera** May 2023 - Oct 2023

Java Backend Bootcamp

**Mindera** 1Month/2023

Java WarmUp

**Bachelor's Degree** 2018-2022

**Instituto Superior de Contabilidade e Administração de Coimbra**

Business Management

# Apresentation Letter

Hello, I'm Gonçalo, 27-year-old, with a Bachelor's degree in Business Management, professional experience in accounting and a passion for technology.

I've always been curious about programming, so my journey into the world of software development began when I embarked on a backend development course at Mindera. During this immersive experience, I learned essential technologies, including Java, Spring Boot, Quarkus, MySQL, Maven, and Docker. At the moment I'm learning React. Along my journey, I'm adding projects to my Github.

## Github Projects

### Projects and Task Management (Fullstack)

**Technologies:** React, Java, Spring Boot, Mysql, Maven and Docker

*[Github Fullstack Project](#)*

### Diabetic Care Backend

**Technologies:** Java, Spring Boot, Mysql, Maven, Docker, Junit5 and Mockito.

*[Github Diabetic App](#)*

### Food Delivery

#### Backend with RabbitMQ

**Technologies:** Java, Spring Boot, RabbitMQ, Maven, Docker, Mysql, Junit5 and Mockito

*[Github Food delivery RabbitMQ](#)*

### Ecommerce

#### Backend with Kafka

**Technologies:** Java, Spring Boot, Apache Kafka, Mysql, Maven, Docker, Junit5 and Mockito

*[Github Ecommerce Kafka](#)*

### Events Management Backend

**Technologies:** Java, Spring Boot, Mysql, Maven, Docker, Junit5 and Mockito.

*[Github Events Management](#)*

### Ecommerce Backend

**Technologies:** Java, Quarkus, Mysql, Maven, Docker, Junit5 and Mockito

*[Github Ecommerce](#)*

### The Sims

**Technologies:** Java
